The New Treatment Fund

**Medicines Recommended by NICE and AWMSG:
Health Board Formulary Status
(From 1 January 2017 to 30 June 2019)**

EXECUTIVE SUMMARY

Of the 183 medicines within the New Treatment Fund which were recommended more than 60 days ago, all health boards had at least 95% of these medicines on formulary within 60 days.

Of the 183 medicines within the New Treatment Fund which were recommended more than 60 days ago, an average of 13 days was taken to add these to formularies.

Of the 10 medicines within the New Treatment Fund which were recommended within the last 60 days, five health boards had at least 70% of these medicines on formulary.

Of the 193 medicines within the New Treatment Fund, all health boards had at least 95% of these medicines on formulary.

BACKGROUND

The Welsh Government launched the New Treatment Fund in January 2017. The fund provides an additional £16 million annually for health boards and trusts in Wales to support the faster introduction of new medicines recommended by the National Institute for Health and Care Excellence (NICE) and the All Wales Medicines Strategy Group (AWMSG).

The New Treatment Fund requires the seven health boards and one NHS trust to make recommended medicines available as soon as is reasonably practicable and certainly within 60 days of the publication of the decision. For NICE recommendations, a medicine should be available no later than 60 calendar days after the first publication of the Final Appraisal Determination (FAD), or the Final Evaluation Determination (FED) for Highly Specialised Technologies (HSTs). For AWMSG recommendations, a medicine should be available no later than 60 calendar days after ratification of the recommendation by the Welsh Government. Occasionally the start of the 60 day timescale may be delayed because a Commercial Access Agreement (CAA) has not yet been agreed. In such circumstances this is indicated within the report. NICE and AWMSG may recommend an entirely new medicine, or a new use of an existing medicine to treat a different condition, for routine use in the NHS. Although recommended medicines should be made available within 60 days of recommendation, the sooner they are available, the sooner they can be prescribed where clinically appropriate.

In April 2017 the Welsh Government issued revised directions for health boards and NHS trusts, with an accompanying Welsh Health Circular, *The New Treatment Fund – Access to medicines recommended by NICE and AWMSG* (WHC [2017] 001).

A health board formulary is an official list of medicines which may be prescribed within the health board to treat patients. Until a medicine is added to the formulary, prescribers may not be aware that it is available for use.

This document reports on the formulary status of medicines recommended for use within NHS Wales by NICE and AWMSG. All data in this report is as of 30 June 2019.

SOURCE OF INFORMATION

This report has been compiled through a combination of an analysis of health board formularies and the submission of data and additional information from Chief Pharmacists. Velindre NHS Trust treats certain types of cancers only; the report therefore only takes account of those medicines clinically appropriate for inclusion on the trust formulary.

Table 1. Formulary status and time elapsed since latest AWMSG/NICE recommendation for New treatment Fund medicines (30 June 2019)

* Time to formulary addition from appraisal approval date should be within two months for AWMSG Health Technology Appraisals (including the orphan and ultra-orphan appraisal process), NICE Health Technology Appraisals and HSTs and cancer drugs. For NICE recommendations these should be following the first publication of the FAD or the FED for HSTs, and for AWMSG approvals following Welsh Government ratification.

[^] Number of days from latest AWMSG/NICE approval statements and formulary status are data submitted by health board/trust. Where no number is provided this can generally be assumed to indicate that the medicine is "already on formulary" but for a different indication. However this is not always the case.

[#] The determination of formulary status is considered as the availability of the medicine to treat patients.

[¥] CAA (Commercial Access Agreement) Available Date information is provided by the all Wales Medicines Procurement Specialist Pharmacist

Key		On formulary. Where a number is stated this represents the number of days from AWMSG/NICE approval to formulary addition. '-' indicates that the medicine is already on formulary for the appraised indication. '[']' indicates a medicine has been added to formulary in advance of the CAA being agreed; stated number is number of days from AWMSG/NICE approval.
		On formulary. However the number of days stated is outside of the 60 day timescale.
		Not on formulary and within 60 days of approval date. Stated number is the number of days from AWMSG/NICE approval to 30 June 2019.
		Not on formulary and outside of 60 days since approval date. Stated number is the number of days from AWMSG/NICE approval to 30 June 2019
		Medicine is subject to a CAA. Stated number is the number of days from CAA availability to 30 June 2019. '-' indicates CAA is not yet available.
